

## SUMMARY

### INVESTMENT OBJECTIVE

The primary goals of the LOGIX Tactical Dividend Strategy are:

- **Downside protection**
- **Capital appreciation**
- **Cash flow from dividends**

LOGIX is unique among equity managers focused on dividend yield. The strategy utilizes historical absolute and relative yield thresholds by industry as a means to evaluate the potential for capital appreciation. The benefit to the portfolio is attractive industry entry points and a relatively high level of current income.

Since its inception in April 2002, LOGIX has outperformed the S&P 500 and iShares Russell 1000 Value ETF with lower volatility (beta of 0.64).

### PROCESS AND CHARACTERISTICS

The LOGIX Tactical Dividend Strategy proprietary process begins by screening all U.S. listed equities for companies with a 10 year history of uncut dividends. Fundamental screens eliminate companies with questionable balance sheets. Industries that do not have an adequate number of screened companies needed to meet our diversification requirements are eliminated.

The resulting, eligible universe contains over 50 industries and 400 equities at any given time.

#### The characteristics of the invested portfolio are:

- Typically 5-9 industries and 25-45 names
- No industry may represent greater than 20% of the portfolio at cost
- No single equity can be greater than 5% of the portfolio at cost
- Buy, sell, and hold decision criteria are based on clearly defined yield thresholds
- Low portfolio turnover/tax efficient strategy
- Complete transparency using a separate accounts platform

## DISCLOSURES

Past performance does not guarantee future results. This performance report should not be construed as a recommendation to purchase or sell any particular securities held in composite accounts. Market conditions can vary widely over time and can result in a loss of portfolio value. Additional information regarding policies for calculating and reporting returns is available upon request. Composite returns are "Pure Gross" and presented gross of management fees (unless otherwise indicated) and include the reinvestment of all income, dividends and interest paid. S&P 500 Index and iShares Russell 1000 Value ETF results shown are total return. Gross Returns do not reflect the deduction of investment advisory fees. Client's returns will be reduced by the advisory fees and any other expenses the client may incur in the management of its account. Investment advisory fees are described in Part 2 of the firm's Form ADV and can be obtained by contacting Investor Relations.
